With high quality and standardized machines which are available for the productions of the crops in the fields of the agriculture.

### Specifications

Type	Mud Loader	Application	Construction	Color	Multicolour
Condition	New	Warranty	1 Season	Driven Type	PTO

# PRODUCTS

## Specifications

Material	Metal	Use	Levling	Application	Agriculture Use
Weight	200-400kg	Color	MultiColour	Automatic Grade	Automatic
Warranty	1yr	Engine Power	More Than 45 HP		

## LASER LAND LEVELLER

We have well-equipped technology for the agriculture which is used for the agricultural purposes which is used for the soil and to have the traditional practices into the new modernized techniques in which the farmers can work easily and in convenient manner which is beneficial for the farms land which is available at an precise and durability at the competitive market at the good rates to fulfilled the requirements of the clients.

## MINI COMBINE HARVESTER

Mini combine harvester is the well developed equipped machine which is used for the small scale farming in which it is suitable for harvesting the rice and wheat at surplus manner in the convenient and fastest manner we authorized to deals in the manufacturing this machine in the market to adopt the maximum amount of the wheat and rice in the farming with the new techniques and advanced technology at the competitive prices which is precise and have durability of the product.

## Specifications

Type	Mini Combine Harvester	Use	Harvest	Fuel Type	Diesel
Condition	New	Driven Type	PTO/Hydraulic		
Warranty	1 Season				

## MAIZE THRESHER

Maize thresher is the newly innovative technology in which the maize is separated easily from the maize and separated in the fields of the agriculture. With highly quality productivity of the maize which maximizes your crop production in the short period of time and have the newly advanced technology of this product that makes your production of the crop in the well-equipped tools and equipment of the productivity of the thresher which increases your products in the amazing manner which makes your productivity in the newly skilled manner.

## Specifications

Use	Maize Threshing	Condition	New	Colour	Multicolour
warranty	1 Season		Driven Type	PTO	

# PRODUCTS

## ROTAVATORS

Rotavators are the machinery which is used for the agricultural purposes in which produces the crops in the intensively manner which highly introduced the innovative technology of this products and makes your production of crops in the abundance manner which delivers the high and deals in the manufacturers of the crop yields machinery which delivers you the bulk of the crops at the times which have the highest rates of the productions in the fields of the agriculture

### Specifications

Type	Rotavator	Color	Multicolour	Condition	New
Driven Type	Hydraulic / PTO	Warranty	1 Season	Blade Shape	L Type / C Type

## GROUNDNUT THRESHER

Groundnut thresher is the best high and advanced technology in which the machines are developed in the well-designed manner to which removes the seeds from the husk in which to separates the nut from the shells which makes easier and convenient equipment and tools which is used for the framings, which increases the productions and decreases the man powers and works in effective and efficient manner. It is the process of grinding the groundnut from the thresher in the fields.

### Specifications

Type	Groundnut Thresher	Use	Agricultural	Color	Multicolour
Condition	New	Driven Type	PTO	Power Source	Diesel
Warranty	1 Season				

## HAPPY SEEDER

Happy Seeder is important for farming and helps to cut time and efforts. You would be amazed by its power and potential to give you better productivity.

Happy Seeder It Also Help To Save The Environment

### Specifications

Material	Iron / Metal Sheet	Seed Dropping	Automatic	Usage	Agriculture
Colour	Multicolour	Condition	New	Number Of Transplanting Rows	Roller
